- Friday 21st September 10:15 - 12:30
- Friday 21st September 13:00 - 15:00

### Description

ASIO NEW, spol. s r.o. is a company dealing in wastewater treatment, water purification and air cleaning. A part of its activities is devoted to the issues of rainwater and greywater, their recycling processes. In the Czech Republic, ASIO NEW is a leading innovator in these technologies.

### Organization Type

Company

Areas of Activities

**Architectonic, design, construction engineering services**

**Construction materials**

**Waste**

**Sustainable constructions and Green buildings**

Offer

## Rainwater management

Rainwater may sometimes bring an opportunity, at other times a problem. In our offer, you will find solution for both cases. Plastic tanks are used for rainwater storage and its subsequent use (non-drinking water); drainage systems provide for removal of rainwater from hard surfaces (e.g. car park drainage) or they support rainwater quick soaking.

Cooperation Offered

1. Sales / Distribution
2. License agreement

#### Cooperation Requested

1. Sales / Distribution
2. Outsourcing co-operation

#### Offer

### **Wastewater treatment plants**

Small-scale wastewater treatment unit for households are intended for mechanical-biological treatment of municipal wastewater. The biological treatment unit can replace a septic tank or cesspool and therefore it is used for treatment of soil water from family houses, lodging-houses or cottages. AS-VARIOcomp K household treatment unit is the most suitable unit for family houses, because quick return on the amount invested and low operating costs are their major advantages.

#### Offer

### **Water treatment**

Water preparation processes comprise a wide range of technologies and physical-chemical methods. Methods must be selected with a view to the purpose of the use of the prepared water - the preparation of potable water requires a different approach from, e.g., the preparation of cooling water, feed water for boilers, or process water.
